'Sir:

In response to the Office Action mailed on October 26, 1999, kindly amend the application as follows:

CLAIMS:

Please amend the claims as follows:

(Twice Amended) A method for transmitting information from a server to a client

station in a mobile-based-client-server system, comprising the steps of:

determining that the server has information to be transmitted to a client station without the client station initiating the determination by establishing a connection to the server; and

transmitting a message from a transceiver associated with the server to a transceiver associated with the client station, the message indicating that the server has information for the client station.
